## DETAILED ACTION

### *Allowable Subject Matter*

1. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a non-transitory computer readable information storage medium, the apparatus and the method of handling a user input in an interactive mode comprising a full mode and an embedded mode, in which played back AV data is displayed with a markup document. Each independent claim identifies the uniquely distinct features "the markup document comprises first event information that, when read by an ENAV engine, causes the ENAV engine to inform, by default, an AV playback engine, which plays back the AV data, of an occurrence of a key input event corresponding to a user action, and second event information that, when read by the ENAV engine, causes the ENAV engine to prohibit informing the AV playback engine, which decodes the AV data, of the occurrence of the key input event", and "the first event information comprises event registration information to check whether the user performed the action and event handling information to handle the event by controlling an operation of the AV playback engine when the key input event occurs."

The closest prior arts, Lamkin et al. (US 7,178,106 B2) and Otsuka et al. (2003/0044171 A1) disclose the conventional machine readable medium information storage medium, apparatus, and method of handling a user input, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2481

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
